Take advantage of our
innovation on the capital
market, the Frozen Chips®
of the **busy dynamic fund®!**

busybank®

say beezeeeh!

Cross your heart: don't you agree that stable, conventional investments in ongoingly dynamic world markets bring outdated limitations? In face of the global banking crisis and the international stock market meltdown, national leaders from the U.S. to Cyprus have their hands full trying to maintain value to savings account holders. Their well meant recommendations to return to savings books and government bonds will evaporate all possibility of gains drastically, down to 4–7%. After all, safety has its price, even if a small one...

The busybank® offers clients who think in market oriented ways and don't believe high yields are history a unique opportunity to invest in **Frozen Chips**.

What are **Frozen Chips**? First of all, they're the best: these values are the top current innovation on the capital market and make yields of 100% possible. And that, within only 3–4 months maturity?

Frozen Chips are an investment form which – to put it poetically – offer weather-proof value even in turbulent weather conditions. In the high-risk segment of the stock market, Frozen Chips distinguish themselves by astonishing permanence. **Frozen Chips** are also eminently attractive. In a worst-case scenario, i.e. bankruptcy, the remaining capital deposits are donated to social causes.

Admittedly, there are also products on the market which offer a better safety net, but here at busybank® we believe that our clients don't need above average adventurousness for above average profits, but rather, the concentrated expertise of a professional team in the field of investment banking. We are of the opinion that even when the risks are higher, competent management can navigate a profitable course through the winds.

How do we know? Very simple: investment experts are not the best, not even the very best, they are 100% beezeeeh!

Our stock profilers don't merely have the best instincts for the ever-faster changes in the asset management sector, they also have the beezeeeh! strategy: a dynamic finance

market demands a dynamic investment strategy! Dynamism within the limits of relative control is the patent for success, so that our busy dynamic fund® even grows in critical times. After all, what really distinguishes talented money management becomes evident only in a recession.

A last thought: we at busybank® would actually prefer that you don't believe our advertising, but come convince yourself. Have a look at our portfolio for the last 5 years, the comparison will convince you of our abilities. For the final notch of assuredness, a personal chat with one of our certified investment counsellors will show you the whole truth.

Our services are of course also beezeeeh!

- Graduated fees
- Monthly performance reporting
- Web rating, and lots more besides

busy dynamic fund® (compared to high-risk portfolios of Reiffaisen European and Deutsche Bank)
